# General Information

This catalog is published in compliance with the Kansas State Use Law (SUL), as set out in K.S.A. 75-3317 through 75-3322. The intent of the SUL is to support employment opportunities of Kansans who are blind or disabled. Purchasing SUL products and services from these exceptional Kansans helps them to be a productive force contributing to the economy of our State. When a State agency or Unified School District needs to purchase products contained in this catalog, it is a violation of Kansas law to purchase such products from any source other than those vendors in this catalog. The Kansas Director of Purchases, in conjunction with the Kansas State Use Law Committee, has found the items in this catalog to be consistent with "The Kansas Use Law," priced competitively and has approved them as mandatory purchase items from Kansas SUL vendors.

## A Summary of Kansas Law about Purchasing

### Summary of K.S.A. 75-3321

The Director of Purchases and any person or officer authorized to purchase materials and supplies for any State agency or Unified School District operating in Kansas, or to purchase services for any agency within Kansas State government, shall purchase, from the catalog, "Products and Services Manufactured and Offered By Blind and Severely Disabled Kansans," at any time when the listings in that catalog will meet the needs of the agency or school district.

### Summary of K.S.A. 75-3322

Whenever the qualified vendors represented in this catalog are unable to supply the products or services needed, or are unable to meet delivery requirements on any purchase order or requisition, a written waiver request shall immediately be forwarded to the Director of Purchases by the state agency procurement officer or purchasing officer of the Unified School District. If approved by the Director of Purchases such waivers shall relieve and exempt the state or Unified School District from the purchasing requirements set forth in the relevant Kansas laws (K.S.A. 75-3317 and 75-3322). The waiver granted shall apply only to the case of the specific purchase order, request or requisition.

## Benefits of the program

- Yields meaningful employment and training
- Compliments and encourages efforts to deinstitutionalize people who have disabilities
- Advocates self-sufficiency for those with disabilities
- Reduces cost of service care for people with disabilities
- Encourages community involvement and support of people who have disabilities
- Supports efforts for a good business approach to spending vocational rehabilitation dollars
- Increases tax base
- Decreases tax requirements
- Stimulates growth of Kansas local economy
- Ensures continuity in the supply of needed services and products to customers
- Provides opportunity for State agencies to contract for services at a lower cost than in-house services
- Promotes productivity in vocational rehabilitation centers

## Our Policy

We place strong emphasis on the quality and reliability of our products and services.

Our products and services are guaranteed to give satisfaction.

If there is a factory error, the qualified vendor will issue proper credit or replacement after receipt and inspection of goods.

Freight will be paid by the qualified vendor if a factory error was made.

Feel free to write or call with any comment. You will receive fast, personal attention.

We want you to be as pleased as we are with the efforts of our facilities.

## Soft Refuse Liners

### High Density

The high molecular weight of the **high density** polyethylene resin produces an economical liner that is approximately 1/3 the weight of traditional can liners. The use of fewer raw materials returns less plastic to our environment. **Great for office, kitchen and bathroom applications.** **Good load-bearing capabilities.**

## Visi-belt®

Light Reflective Safety Belt

- A durable vinyl with reinforced webbing
- Quick release buckle
- Limited load bearing capability
- Adjustable 31" - 55"

### Time = Safety

At 55 miles per hour, a driver can't see a dark-clothed pedestrian crossing the road from more than 50 meters away - yet needs 100 meters to safely stop. A Visi-belt makes that same pedestrian visible from 136 meters - a 172% improvement.

## 1" and 2" Standard Size Pleated Air Filters

**Filter Media:** The filter media used on both standard and custom filters is a high performance, non-woven, cotton fabric fully supported with an expanded metal wire grid.

**Filter Trays:** The die cut filter trays for standard filters are pearl-coated beverage board. The filter trays used for custom filters are hand-assembled from pearl-coated chip board and are supported with metal material.

**Test Results:** Pleated filters have an average dust weight arrestance of 92 percent on 1" thickness and 95 percent on 2" thickness per ASHRAE standard 52.1-1997.

**Pleats:** 1" and 2" pleated filters have 12 pleats per linear foot.

## Standard Size Polyester and Fiberglass Air Filters

**Filter Media:** The filter media used in the manufacture of polyester filters is a synthetic fiber media that exhibits a uniform density and resilient body. The material also has higher arrestance efficiency than fiberglass. The media used in the manufacture of fiberglass filters is a progressive graduated density glass fiber material, composed of continuous filament glass fibers bonded together with a thermosetting resin.

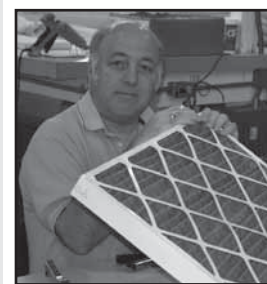

**Filter Trays:** The material used to manufacture the die cut filter trays for standard sizes is pearl-coated beverage board. The filter trays for custom sizes are hand assembled from pearl-coated chip board and are supported with metal material.

**Test Results:** Polyester filters have an average dust weight arrestance of 79 percent on 1" thickness and 89 percent on 2" thickness per ASHRAE standard 52-76. Fiberglass filters have an average dust weight arrestance of 70 percent on 1" thickness and 80 percent on 2" thickness per supplier performance data.

KETCH offers a variety of Crews Safety Glasses meeting ANSI Z94.3/Z87. Crews brand provides protection against moderate impact hazards, metal chips, particles, and sparks. Tinted lenses provide sun glare protection only and are not to be worn in welding environments. Special welding lenses provide protection from infrared rays and have the shade number stamped on each lens. **No welding lenses are offered for sale on this page.** However, those we offer through the Crews brand provide virtually 100 percent protection from ultraviolet rays.

Refer to your ANSI manual or a safety specialist for proper selection as some operations may also require safety glasses and face shields, machine guards, etc.

## Crews Storm Safety Glasses

Designed for a comfortable fit, the STORM glasses feature a lightweight scratch resistant polycarbonate wrap-around lens with 99.9 percent ultraviolet protection, and ratchet-action temples with non-slip rubber head-grips.

## Guidelines for the Purchase, Use and Return of Printer Cartridges for Laser Printers, Inkjet Printers, Fax and Multi Function Machines

The State Use Catalog Vendor for laser printer cartridges, inkjet printer cartridges, multifunction and fax machine cartridges is:

**Cartridge King of Kansas, Inc.**

### Recycle ALL Printer Cartridges

Printer cartridges purchased with state funds are the property of the state, and they have monetary value even after they are empty. Since disposal of printer cartridges adds to the tonnage of solid waste in landfills and can contribute to the depletion of natural resources, state agencies, universities and school districts must recycle printer cartridges whenever possible.

When a printer cartridge is empty, DO NOT throw it away, and DO NOT offer or sell it to a third party. The state's printer cartridge remanufacturing program requires that each empty cartridge be returned to the approved State Use Catalog Vendor. Failure to return empty cartridges may result in an additional core charge upon reorder. Returning empty toner cartridges to the approved State Use Catalog Vendor reduces cartridge remanufacturing cost and waste in our landfills.

**To assure the state's printer cartridge remanufacturing program, all cartridges used by state agencies and school districts should be remanufactured whenever possible. Order a remanufactured product unless one of the following conditions apply:**

1. Adequate market research establishes that remanufactured cartridges do not exist for the type of equipment used.
2. The price with the same page yield offered for the remanufactured cartridge is higher than a new cartridge from the Original Equipment Manufacturer (OEM).
3. Remanufactured cartridges are not available in quantities needed within the timeframe required.

The State Use Catalog Vendor for toner cartridges offers both remanufactured and new Original Equipment Manufacturer (OEM) toner cartridges.

### What Do I Do With Empty Cartridges?
